

The Convergence Point

The Convergence Point exists to help reach as many people as possible for Christ. This can only be done as individual Christians impact other people in the marketplace and churches move beyond their buildings back into the culture.

The church represents the single most important organization on the planet. Its leader's message is the only real hope for the people of the world and the success of its missions will impact billions for eternity.

Christians must reclaim their ultimate passion and purpose by living their daily lives in a way that will both glorify God and impact other people. When we become fully committed to Christ, we will see our career as a calling, our families as a ministry, our friends as an encouragement and other people as a priority.

If you are a church in transition or a Christian in the workplace we want to partner with you to help change your part of the world one person at a time.
